Transportation*

PET TRANSPORTATION SPECIALIST - DISCOUNT AIRFARE RATES - SHIPPING AND GROUND TRANSPORTATION SERVICES

P.O. BOX 450 - MOUNT VERNON, MO 65712

## Proper Crate Assembly

# Crate Assembly (Outside)

- Each Crate must have 2 Live Animal stickers (one on each side)
- Health Certificate in a zip lock bag and taped to the top, front of the crate along with any other paper work; shot record, health certificate etc....
- Clear zip lock bag of dog food taped to the top, back.
- Live Animal sticker on top with shipper and consignee information. PLEASE make sure there is a valid phone number!!!

# Crate Assembly (Inside)

- Shredded paper works best (not newspaper)
- Food and water dish zip tied to the front door. (this makes it easier for airline agents to water your pet if needed without opening the door.)
- Your pet must be able to sit, stand, and turn around comfortably. It must have at least 2 inches between the pet's ears and the top of the crate
- And as always the **agent has final say** if your pet is able to fly.
- Most important – The pet!!

# And there you have it you and your crate are ready for the airport.

Thanks for using RunWay Pets Inc.
